DISCHI FRENO

BRAKE DISCS | DISQUES DES FREINS | BREMSSCHEIBEN | DISCOS DE FRENO

Disco standard

I dischi Newfren sono prodotti con un acciaio AISI trattato termicamente.

A seconda della tipologia del disco e della necessità produttiva vengono utilizzati i metodi di tranciatura e/o taglio al laser. Particolare cura viene data alla finitura finale del prodotto per garantire il parallelismo della fascia frenante (al quale diamo una tolleranza molto ristretta), garantendo così la scorrevolezza della ruota. Troverete la frenata modulabile e progressiva.

Ovviamente, l'apice delle performances lo si raggiunge accoppiando il disco con pastiglie freno Newfren, disponibili in materiale organico o sinterizzato.

Standard disc

Newfren brake discs are produced with AISI heat treated steel.

According to the type of the disc and to the production needs we use mould or laser cut systems. We pay a lot of attention to the final finishing of the product to assure the parallelism of the brake rotor (for which we offer a reduced tolerance) to get a good flow of the wheel. You will have a modulated and progressive braking.

Of course you can reach the top of the performances by fitting the Newfren brake pads which are available in organic and sinter compound.

Disque standard

Les disques des freins de Newfren sont produites dans acier AISI traites thermiquement.

Selon le type de disc et les exigences productives nous les produisons par moules ou au laser. Nous donnons beaucoup d'attention à la finition du produit pour assurer le parallélisme de la bande de freinage (pour la quelle nous offrons une tolérance réduite) pour donner une bonne fluidité de la roue. Vous aurez donc une freinage modulé et progressive.

Naturellement vous allez joindre le top des performances si vous utilisez les plaquettes Newfren qui sont disponibles dans les mélanges organiques et métal-fritté.

Disco standard

Los discos Newfren están fabricados con acero AISI tratado térmicamente.

Según el tipo de disco y la necesidad productiva se usa el método de estampación o corte con laser. Prestamos especial atención al perfecto paralelismo de ambas caras (damos una tolerancia muy baja) garantizando así la suavidad de giro de la rueda. Encontrareis la frenada modulable y progresiva.

El comportamiento óptimo de los discos se consigue combinándolos con pastillas de freno Newfren, disponibles en material orgánico o sinterizado.

Disco fisso

Il Disco fisso è intercambiabile all'originale. Abitualmente viene montato sulla ruota posteriore o, nel caso di modelli meno recenti anche anteriormente.

Newfren mette a disposizione l'intera gamma anteriore e posteriore, garantendo sempre ottime prestazioni.

Fixed disc

The fixed brake disc can fully replace the original. It is usually fitted on the rear wheel or, in case of less recent models also on the front wheel.

Newfren offers the complete front and rear range and assures high performances.

Disque fixe

Le disque de frein fixe peut remplacer tout à fait le pièce d'origine. Il est normalement monté sur l'arrière ou dans le cas de modèles que ne sont pas récentes, aussi sur l'avant.

Newfren offre la gamme complète des disques avant et arrière et assure des hautes performances.

Disco fijo

El disco fijo es intercambiable con el original. Normalmente va montado en la rueda trasera o, en el caso de modelos menos recientes, en la rueda delantera.

Newfren tiene disponible la gama completa, garantizando siempre óptimas prestaciones.

DISCHI FRENO

BRAKE DISCS | DISQUES DES FREINS | BREMSSCHEIBEN | DISCOS DE FRENO

Disco flottante

Per l'utilizzo estremo, Newfren consiglia il disco freno flottante da utilizzare anteriormente. Prodotto secondo un disegno Newfren, questo disco offre la particolarità del materiale trattato termicamente e garantisce ottime prestazioni, soprattutto se abbinato alle pastiglie sinterizzate Newfren "S2".

La particolarità del disco flottante è la fascia frenante svincolata dal mozzo centrale (cioè che si "muove" appunto liberamente su nottolini in Ergal ricavati dal pieno, anodizzati ed induriti con il trattamento che Newfren predispone). Questo sistema riduce sensibilmente lo stress del disco, diminuendo il consumo. Inoltre, migliora sensibilmente lo smaltimento del calore, lasciando libera la fascia frenante di deformarsi. L'ottimizzato raffreddamento ottenuto con questo sistema, eviterà inoltre, il fastidioso problema dell'arretramento delle pastiglie all'interno della pinza (pericoloso "pompate a vuoto") che spesso si verifica durante l'uso intenso in lunghe discese di mulattiere o ripidi sterrati.

Floating disc

For an extreme use, Newfren suggests for the front wheel, the floating brake disc. Produced according to a Newfren drawing, this disc offers the peculiarity of a heat treated material and assures very good performances, above all if combined with Newfren sinter "S2" brake pads.

The peculiarity of the floating brake disc is the rotor which is unlinked from the central hub (it freely moves on Ergal bobbins machined from solid, anodized and heat treated).

This system highly reduces the stress of the disc therefore the wear. Moreover it offers a better disposal of the heat, so that the brake rotor can easily adjust. The better cooling reached with this system will avoid the irritating problem of the withdrawal of the brake pads inside the caliper, which often happens during the strong use in downhill.

Disque flottant

Pour un 'utilisation extrême, Newfren conseille pour la roue avant, le disque flottant. Produite selon un dessin de Newfren, ce disque offre la particularité du matériel traité thermiquement et assure des excellentes performances, surtout si monté avec des plaquettes Newfren sinter «S2».

Le développement technique est né par une collaboration avec les pilotes du Championnat Mondial Off-road. Le résultat est un produit les quels points de force sont la légèreté et la résistance. La particularité du disque flottant est la bande qui est dégage du moyeu central (elle bouge librement sur le boutons en Ergal usinés, anodisés et traités thermiquement).

Ce système réduit beaucoup le stress du disque et par conséquence il dure longtemps. En plus il améliore l'évacuation de la chaleur, ainsi que le disque peut facilement se modifier. Ce système permet au disque de se rafraichir plus rapidement donc il évite l'embêtant problème du reculement des plaquettes dans l'étrier, qui souvent arrive pendant un' utilisation extrême dans le descentes tous terrains et les sentiers de champagne.

Disco flotante

Para uso extremo, Newfren aconseja usar disco flotante en la rueda delantera. Fabricado con diseño Newfren, este disco tiene la eficiencia del material tratado térmicamente, garantizando óptimas prestaciones, sobre todo si se usa en combinación con las pastillas sinterizadas "S2".

La particularidad del disco flotante es que la pista frenante va desvinculada del buje central (es decir, se mueve libremente sobre los trinquetes de Ergal mecanizados, anodizados y endurecidos con un tratamiento que Newfren elabora).

Este sistema reduce bastante los esfuerzos del disco, disminuyendo su desgaste. Asimismo, mejora mucho la disipación del calor, con lo que la pista de frenado no se deforma. La óptima refrigeración con este sistema, evita la fatiga de las pastillas (peligrosa frenada en vacío) en largas bajadas o en pistas muy pendientes.

DISCHI FRENO

BRAKE DISCS | DISQUES DES FREINS | BREMSSCHEIBEN | DISCOS DE FRENO

Disco strada

Fissi e flottanti. La piu' recente novità NEWFREN sono i dischi flottanti anteriori, prodotti secondo il tradizionale standard aziendale, fatto di materiali di prima qualità, lavorazioni all'avanguardia e design innovativo ed esclusivo Newfren.

I dischi NEWFREN garantiscono prestazioni senza compromessi, estetica accattivante e racing e una significativa riduzione di peso rispetto al prodotto originale.

Sono oggi disponibili per le principali moto sportive e naked presenti sul mercato.

Street disc

Fixed and floating. The most recent NEWFREN news are the floating front brake discs, they are produced according to traditional company level, they are made of first quality materials, avant-garde makings and innovative and exclusively Newfren design.

NEWFREN brake discs assure performances without compromise, winning and racing look and a significant weight reduction compared to the original.

They are available for the most popular naked and sport bikes.

Disque route

Fixe et flottant. Le plus récent nouvelles NEWFREN sont les disques des freins flottantes, ils sont produites selon notre traditionnel niveau, produits avec des matériaux de première qualité, façonnage avant-garde, innovant et exclusive Newfren design.

Les disques de frein NEWFREN assurent des performances sans compromises, ils ont un particulier look et le poids remarquablement réduit par rapport à l'originaux.

Ils sont disponibles pour le plus populaires motos sport et nues.

Disco carretera

Fijos y flotantes. La más reciente novedad de Newfren son los discos flotantes delanteros, hechos según la tradición de la fábrica: material de primera calidad, fabricación vanguardista con diseño innovador y exclusivo Newfren.

Los discos Newfren garantizan altas prestaciones, estética atractiva y Racing y un peso significativamente inferior respecto al disco de origen.

Disponibles para las principales motos deportivas y naked del mercado.

Disco scooter

La gamma Newfren copre quasi interamente il parco circolante scooter, sono infatti disponibili dischi freno per tutti i modelli di tutte le cilindrata.

La qualità del materiale e le tecniche di produzione, fanno si che il prodotto offra la miglior garanzia e prestazione anche nell'uso più stressante come, ad esempio, i percorsi cittadini.

Scooter disc

Newfren range covers almost the total circulating park of scooters, we produce brake discs for the most common models of all capacities.

This product offers the best warranty and the best performance in the most stressful use, as for example in the city traffic, because of the quality of the material and the production technique.

Disque scooter

La gamme Newfren couvre presque tout le parque circulante des scooters, nous produisons les disques de frein pour les plus communes modèles de tous les cylindrées.

Ce produit offre la meilleure garantie et le meilleures performances dans l'utilisation la plus dure, comme par exemple dans le trafic des villes, pour la qualité des matériaux et la technique de production.

Disco scooter

La gama Newfren cubre casi enteramente el parque circulante de scooter. Están disponibles para todos los modelos y todas las cilindradas.

La calidad del material y la técnica de producción hacen que el producto ofrezca la mejor garantía y las mejores prestaciones en el uso más exigente, como el uso diario ciudadano.
